

Are you a competent ventilation systems installer?

Residential ventilation, from a toilet extract fan to a mechanical ventilation with heat recovery system, is 'notifiable work' under the latest Building Regulations and every new installation or refurbishment requiring a new electrical circuit should be inspected, commissioned, tested and signed off by a suitably qualified person.

Airflow operate the NiCEIC approved Domestic Ventilation Systems installer training course which enables participants to demonstrate a high level of competency mapped against relevant National Occupational Standards and the latest Building Regulations affecting residential ventilation.

This two day course comprises both practical "hands-on" system training and a written assessment following an introduction to relevant Building Regulations and supporting documents.

- Comprehensive two day ventilation installer training to the latest Building Regulations
- Benefits from a Nationally Recognised Qualification
- Add credibility and opportunity to your business
- Understand the use of the correct test equipment
- Successful candidates eligible to join the Competent Persons Ventilation Installer Scheme.

Domestic Ventilation Installer Course Overview

The course meets the minimum technical competency requirement for Installers looking to apply to join a Competent Person Scheme in England and Wales for Domestic Ventilation Systems. It is also relevant for installers working in Scotland and Northern Ireland.

Day 1

Fundamental working principles of ventilation systems
Minimum legal requirements
Basic system design
The types of ventilation systems
Passive Stack Ventilation
Intermittent extract fans
Continuous Mechanical Extract Systems
Mechanical Extract Systems with Heat Recovery
Techniques used for installation
The pitfalls associated with poor workmanship
Preparation prior to installation

Day 2

Competent Person Schemes
Mechanical Ventilation Heat Recovery unit commissioning
Inspection and testing understanding the correct equipment
Certification and documentation

Who is it for?

The course is ideal for experienced electricians, plumbers, ventilation installers and heating engineers looking that are to improve their knowledge and understanding of installing Domestic Ventilation Systems.

Learnings

The domestic ventilation training and assessment has been designed to provide the necessary skills in design, installation, testing, commissioning, handover, servicing and fault-finding of ventilation systems in accordance with the latest National Occupational Standards (NOS) and Minimum Technical Competency documents (MTC).

Who is a competent person?

Competent Person Schemes (CPS) allow registered installers who are competent in their field, to self-certify certain types of building work as compliant with the requirements of the Building Regulations in England and Wales.

Competent Person Schemes help to tackle the problem of unqualified builders by raising standards in the industry and enabling consumers to identify competent installers

Platinum Promise

All customers of NICEIC registered contractors who have passed the course and then joined the NICEIC competent persons scheme will be covered by the NICEIC Platinum Promise. The Platinum Promise provides assurance to your customers that any work that has not been carried out in compliance with the building regulations will be rectified.

The Platinum Promise lasts for six years from the date of work completion and covers up to a limit of £25,000 for any one installation. It provides consumers with extra peace of mind and gives NICEIC registered contractors a competitive edge over others.
