

Airflow Developments Restrictions On The Use Of Hazardous Substances In Electronic Components

RoHS Directive (2011/65/EU)

Airflow Developments Ltd are totally committed to complying with the European Directive on the restriction of use of hazardous substances in electrical and electronics equipment, RoHS Directive

To the best of our knowledge this is based on the information provided to Airflow Developments Ltd by our Suppliers, the current materials and components used to produce your products do not contain additives, any of the below materials, as referenced in the EU Directive:

- Cadmium and its compounds
- Hexavalent Chromium compounds
- Lead and its compounds
- Mercury and its compounds
- Polybrominated Biphenyls (PBB)
- Polybrominated Diphenylethers (PBDE's)

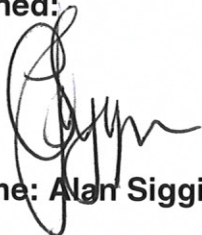

It the policy of Airflow Developments Ltd to continuously monitor the component supply chain to ensure that all current and future products are fully compliant with the RoSH directive. This is maintained and traceable to audit trail for components used within products.

The documents supporting RoSH compliance from our suppliers are kept at the address above.

Any alterations, modifications made to the equipment without prior consultation with Airflow Developments Ltd invalidates this declaration. The statement was approved by the Managing Director on 13th November 2020 and signed on behalf of the Board by Alan Siggins, Airflow Developments Ltd.
