

Airflow Developments Restrictions the Use of Hazardous Substances in Electronic Components (RoHS) Statement

RoHS Directive (2011/26/EU)

Airflow Developments Ltd is totally committed to complying with the European Directive on the restriction of the use of hazardous substances in electrical and electronic equipment.

To the best of our knowledge, this is based on the information provided to Airflow Developments Ltd by our Suppliers, the current materials and components used to produce your products do not contain additives, any of the below materials, as referenced in the EU Directive:

- Cadmium and its compounds
- Hexavalent Chromium compounds
- Lead and its compounds
- Mercury and its compounds
- Polybrominated Biphenyls (PBB)
- Polybrominated Diphenylethers (PBDEs)

It is the policy of Airflow Developments Ltd to continuously monitor the component supply chain to ensure that all current and future products are fully compliant with the RoHS directive. This is maintained and traceable to the audit trail for components used within products.

The documents supporting RoHS compliance from our suppliers are kept at the address above.

Any alterations or modifications made to the equipment without prior consultation with Airflow Developments Ltd invalidates this declaration.

The statement was approved by the Managing Director and signed on behalf of the Board by Alan Siggins, Airflow Developments Ltd.
