

Scope 1 and 2 Net Zero Commitment Statement

Airflow Developments Ltd. is committed to reaching Net Zero greenhouse gas emissions across our operations (Scope 1 and 2) by 2040, using 2022 as the baseline year. In 2022, we reported Scope 1 emissions of 62.83 tCO₂e and Scope 2 emissions of 26.70 tCO₂e (location-based) and 36.24 tCO₂e (market-based).

This commitment forms part of a broader strategy to future-proof our operations and align with the UK's national decarbonisation goals. As a manufacturer of ventilation systems focused on indoor air quality and energy efficiency, we recognise our responsibility to reduce the environmental impact of our own activities.

To meet our 2040 goal, we will:

- Transition our company fleet to fully electric vehicles to eliminate transport-related emissions.
- Scale on-site renewable energy infrastructure to directly power our operations and reduce reliance on grid electricity.
- Enhance energy efficiency in our manufacturing processes and buildings.
- Adopt low-carbon technologies and operational best practices.

Progress will be tracked against annual reduction milestones, supported by verified emissions data and aligned with best practices in carbon accounting. Emissions are measured in accordance with the Greenhouse Gas (GHG) Protocol and disclosed in line with the UK Streamlined Energy and Carbon Reporting (SECR) regulations.

We recognise the importance of value chain collaboration in delivering long-term impact and hence, we are also laying the groundwork for addressing Scope 3 emissions, in parallel.

By taking clear, measurable action today, we aim to support a low carbon built environment and a more sustainable future for our employees, customers, and communities.
